

Introducing the most intuitive, flexible, & efficient software to run your sales, manufacturing, & distribution operations

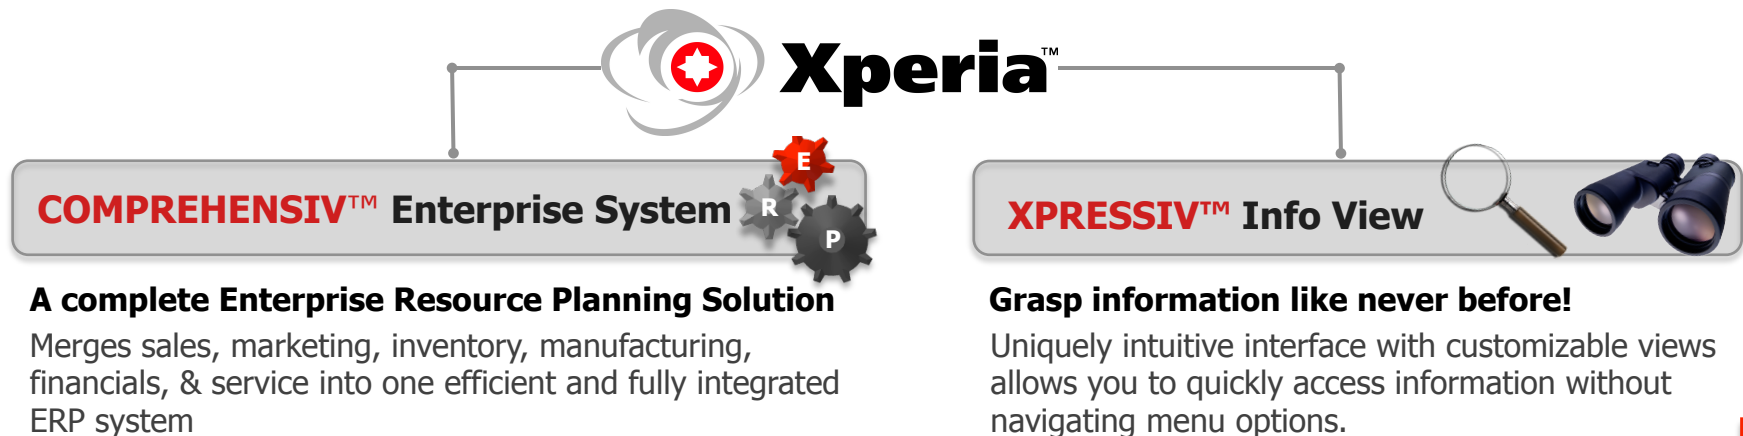

A breakthrough in next-level computing that will transform the way you do business!

All your key business processes in one robust yet easy-to-use ERP system with lightning fast access and real-time reporting

Quickly assess the impact of events and leverage business intelligence to:

Reduce inventory levels, improve cycle times, respond quickly to customer needs, provide higher levels of customer service, increase operational efficiencies, maximize ROI and cash flow

XperiaTM ERP for industrial manufacturing & distribution

COMPREHENSIVTM Enterprise System

A complete Enterprise Resource Planning Solution

Merges sales, marketing, inventory, manufacturing, financials, & service into one efficient and fully integrated ERP system

PLUS

Unparalleled efficiency using "item family" logic

- ✓ Saves time and improves accuracy when defining items and bill of materials relationships
- ✓ Allows sales, forecasts, production, and inventory data to be aggregated, viewed & analyzed at the higher "family" level and at the detailed item level
- ✓ Perfect for groups of items that are similar except for variations such as color, size, and other criteria

XPRESSIVTM Info View

Grasp information like never before!

Uniquely intuitive interface with customizable views allows you to quickly access information without navigating menu options

PLUS

Unparalleled ease of use for data analysis

- ✓ ExcelTM-like data views & data manipulation
- ✓ Robust search & data drill-down
- ✓ Upload, attach & associate files, documents, remarks, tasks, & reminders to data records

Contact us to learn how you can leverage our ERP software to lower costs & increase your competitive edge!
